## **20/10 PERFECT VISION converted into a stock corporation**

***Laser vision care specialist prepares for further expansion and the development of new applications for its FEMTEC® femtosecond laser workstation.***

**HEIDELBERG, September 2007** – 20/10 PERFECT VISION® Optische Geräte GmbH has successfully been converted into a stock corporation and changed its name to 20/10 PERFECT VISION AG. The conversion gives a strategic base for the attraction of investors for the further expansion of the company's activities and the development of novel applications for its FEMTEC® workstation. The FEMTEC® is a revolutionary femtosecond laser for corneal surgery featuring the broadest variety of innovative laser procedures, including refractive laser surgery applications. The fully automated FEMTEC® laser uses a unique curved patient-machine interface for superior safety and patient comfort.

"We are very pleased with the conversion into a stock corporation as it is the result of the impressive development of our company, opens up a better access to the international capital markets and makes us even more attractive for value-adding new investors." commented Ralf Mulflur, CFO of 20/10 PERFECT VISION AG.

About 20/10 PERFECT VISION:

20/10 PERFECT VISION AG of Heidelberg, Germany, develops, manufactures and markets innovative technologies for raising refractive surgery well beyond current expectations. The company's FEMTEC femtosecond laser workstation is set to revolutionize the ophthalmic surgery market, while keeping ease-of-use and patient safety as primary objectives. The ISO 9001:2000 and ISO 13485 certified company also developed WaveScan™, the award-winning wavefront diagnostic device for refractive surgery, acquired by VISX™ (now AMO™, Inc.).
