HEIDELBERG, Germany, March 2007

As truly groundbreaking innovation often is the brainchild of multiple brilliant minds, 20/10 PERFECT VISION would like to acknowledge in the following individuals who have made an especially important contribution to the development of the company's products and technologies. We truly feel honoured working with such outstanding and internationally renowned individuals in bringing vision to perfection.

20/10 PERFECT VISION would like to acknowledge the invaluable contributions of **Dr. Sinan Göker**, Istanbul, Turkey, to the refinement of the FEMTEC laser workstation and many of its current procedures. Dr. Göker with his broad surgical experience of more than 45,000 performed refractive laser procedures has also been especially instrumental in the optimization of the FEMTEC flap procedure. As the worldwide first customer of the FEMTEC femtosecond laser workstation, Dr. Göker has performed hundreds of FEMTEC procedures to date and has an extensive understanding in the use of femtosecond laser technology in ophthalmic surgery. Positioned at the forefront of technology he is always using the newest available upgrades and features.

20/10 PERFECT VISION would similarly like to acknowledge the invaluable contributions of **Prof. Dr. Gerd Auffahrt**, Heidelberg, Germany; **Dr. Mike Holzer**, Heidelberg, Germany; **Dr. Julian Stevens**, London, United Kingdom and **Dr. Mark Tomalla**, Duisburg, Germany. All physicians did support 20/10 PERFECT VISION in demonstrating the versatility of the FEMTEC system in clinical use and gave valuable advise.

About 20/10 PERFECT VISION:

20/10 PERFECT VISION of Heidelberg, Germany, develops, manufactures and markets innovative technologies for raising refractive surgery well beyond current expectations. The company's FEMTEC femtosecond laser workstation is set to revolutionize the ophthalmic surgery market, while keeping ease-of-use and patient safety as primary objectives. The ISO 9001:2000 and ISO 13485 certified company is further pioneering the field of adaptive optics in ophthalmology. 20/10 PERFECT VISION also developed WaveScan™, the award-winning wavefront diagnostic device for refractive surgery, acquired by VISX™ (now AMO™, Inc.).

For more information on 20/10 PERFECT VISION and its proprietary femtosecond laser, please visit: www.2010pv.com.
